TNG School proudly hosted the graduation ceremony of its IGCSE and A-Level students from the Al Daayen and Al Wakra Secondary campuses, celebrating the achievements of the Class of 2024.

This year's event was particularly significant as it marked the first-ever graduating class for Al

Daayen campus, a historic milestone reflecting the school's growth and commitment to academic excellence.

The ceremony was graced by Chief Guest Mr. Syed Mustafa Rabbani, Deputy Head of Mission at the Embassy of Pakistan, and Guest of Honor Mr. Waseem Kotoub, Country Director of the British Council. Community partners, civil society members, and parents also attended, adding a sense of pride and prestige to the occasion.

TNG Principal Ms. Ailia Rizvi addressed the graduating class, congratulating parents, students, and teachers for their dedication. She emphasized that education is a pathway to freedom—intellectual, economic, social, and cultural—and encouraged graduates to embrace these freedoms as they navigate their futures. Ms. Rizvi highlighted the importance of empathy, referencing Margaret Mead's insights on civilization, and urged students to carry these values forward in a world facing significant challenges. She inspired graduates to recognize their potential and approach the future with optimism, reminding them that education fosters connections and understanding.

The atmosphere was charged with excitement as graduates from both Al Daayen and Al Wakra campuses received their graduation certificates, proudly including the Valedictorians: Abdur Rehman for IGCSE Science at TNG Al Daayen Campus, Umar Fida for IGCSE Science, and Syeda

Waniyah Zarrar for Cambridge A-Level Science at TNG Wakra Secondary.

Mr. Abdul Haseeb, Headmaster of TNG Al Daayen Campus, expressed his pride in this accomplishment, stating, “Today, we mark a historic moment for the Al Daayen community. The journey of our first graduating class has been a remarkable one, and their success is a reflection of the hard work of our students, parents, and teachers. This is just the beginning for Al Daayen.”

Ms. Rusna Raiz, Headmistress of TNG Al Wakra Secondary, echoed these sentiments, emphasizing TNG’s commitment to holistic education. “Class of 2024, your academic achievements reflect your dedication, but beyond that, you have grown intellectually, emotionally, and socially. You are ready to face the world, and we are incredibly proud of you,” she said.

A highlight of the evening was the recognition of TNG’s exceptional global achievements, including winning the Global Award at the Your World – Video Making Competition and the Cambridge Outstanding Learner Awards, which honored the top-performing students in Qatar, including Fatima Amir, who received the Top in Qatar Award for IGCSE Islamic Studies, and Muhammad Farhan Arshad, who earned the High Achievement Award for A-Level Chemistry. Additionally, students showcased their innovation at the International Invention, Innovation, and Technology Exhibition (ITEX) in Malaysia, where Menatullah Amro Elmarashly and Maryam Emad Eldin, guided by their mentor Ms. Karren R Baac, presented their project, “Solar-Powered

Aquaveyor,” earning recognition for their creativity and commitment to sustainability. TNG students also achieved significant milestones by finishing as runners-up in the Qatar Debates and excelling at various Model United Nations conferences.

Guest of Honor Mr. Waseem Kotoub praised these accomplishments, especially as he spoke during the Your World Video Making Competition celebration. “Your creativity and innovation have made an impact not only within TNG but globally. You should be immensely proud,” he said, congratulating the winners.

Building on this energy, TNG Director Mr. Riyaz Ahmed Bakali followed with an inspiring address, urging graduates to think beyond conventional boundaries. “The world needs thinkers, innovators, and problem-solvers,” he said. “The knowledge and skills you’ve acquired here will equip you to tackle the challenges ahead. You are the future leaders who will shape a better tomorrow.” His message struck a chord, emphasizing the role of TNG graduates as global citizens prepared to drive meaningful change.

Chief Guest Mr. Syed Mustafa Rabbani further encouraged the graduates by highlighting the importance of resilience and adaptability in today’s rapidly changing world. He reminded the students that success lies in their ability to embrace challenges and seize opportunities, stressing the importance of lifelong learning as they continue their journey.

During the ceremony, special mention and appreciation was given to the dedicated teachers whose exceptional efforts contributed to the outstanding academic results of the graduates.

Teachers were honored for their relentless commitment to guiding students through their IGCSE and A-Level programs, making a significant impact on their success. Their recognition underscored the vital role educators play in shaping the futures of their students.

The event concluded with a heartfelt vote of thanks from TNG CEO Ms. Shagufta Bakali, who expressed deep pride in both the students and teachers. “Your journey has just begun, Class of 2024,” she said. “Believe in yourselves, harness your talents, and embrace challenges. You have the power to redefine what’s possible and leave your mark on the world.” Her closing remarks left the graduates with a sense of motivation and confidence, ready to embark on their next chapter.

As the event drew to a close, the overarching message was clear: the future holds limitless possibilities for the Class of 2024, and their journey of learning, growth, and achievement is just beginning.
