During a special ceremony attended by a crowd of media professionals, influencers, VIPs, and tech enthusiasts, HUAWEI Qatar announced the arrival of the highly anticipated HUAWEI Mate XT in the Qatari market, the world's first triple-fold smartphone. And the most anticipated smartphone in 2025, which surprised the world and sparked the excitement of tech enthusiasts

around the world looking to get it. During the mega event held at Place Vendôme.

HUAWEI Mate XT | ULTIMATE DESIGN pre-order from 20th Feb at QAR 12,999 at HUAWEI branch in Place Vendôme, HUAWEI branch in Doha Festival City Mall. and HUAWEI branch in Al Nasr Street. In addition, first-time All customers will be able to get one-time (one-year) screen protection worth QAR 2,599.

HUAWEI Mate XT | ULTIMATE DESIGN

The HUAWEI Mate XT is a phone of many firsts. Besides being the first triple-fold smartphone to be commercially available, it took several tech breakthroughs to make such a phone possible. With a huge 10.2-inch display, this is the world's largest smartphone, yet it's also the thinnest at just 3.6mm. That's barely thicker than the height of the USB-C port on the phone. The Eonic curves camera ring makes the tri-fold design even more unique, featuring a unique folded metallic vein pattern on each piece. The beauty of the Eonic Curves' marble vein texture lies in its craftsmanship and the exquisite 80-layer structure with a precise 2mm spacing between each layer.

The largest smartphone display ever is also the world's first screen to receive a TÜV Rheinland Display Quality Five-Star Certification. It has industry-leading large-screen quality and exquisite picture quality that shows rich details. It can be used in single-screen, dual-screen, or triple-

screen modes. When completely folded, the screen measures 6.4 inches, the size of a normal smartphone. Unfold it once and users will get a 7.9-inch dual screen mode. When fully unfolded, it becomes a vast 10.2-inch screen with 3K resolution and a golden aspect ratio of 16:11.

Yet another leap made is in the foldable camera realm. This incredibly slim smartphone manages to fit in a 10-step adjustable physical aperture, a first for a foldable smartphone. This gives users even more control over light intake and depth of field while shooting. The phone also supports ultra-wide angle photography and comes with a periscope camera with 5.5x optical zoom, making it easy to capture both distant or close-up subjects with stunning clarity.

A smartphone that folds both inwards and outwards at the same time requires some ingenious hinge design. The Advanced Precision Hinge System on the HUAWEI Mate XT uses ultra-strong ultra-high strength steel to ensure the durability of this complex folding mechanism. It's even more amazing that such a slim phone still packs a 5600mAh battery, more than many flagships, and supports 66W HUAWEI Super Charge and 50W Wireless HUAWEI SuperCharge.

The HUAWEI Mate XT | ULTIMATE DESIGN is undoubtedly the most cutting-edge smartphone right now. Don't miss your chance to be among the first to experience the future.
