Tehran, June 22 (QNA)– Iranian Foreign Minister Abbas Araqchi discussed the latest developments in the wake of the US attack on Iran's nuclear facilities in a phone call today with his British counterpart, David Lammy.

Iran's Tasnim international news agency reported that Araqchi strongly condemned the attack, considering it a flagrant violation of international law.

For his part, British Foreign Minister David Lammy expressed his regret over this action, denying any role or cooperation of his country in the attack, and calling for the continuation of the diplomatic process to overcome the crisis.
