Doha-Qatar, July 22, 2025 – The Lincoln Corsair has for half a decade been a beacon of attainable luxury in the compact crossover SUV segment, and the 2025 model year continues that tradition with an even greater emphasis on personalization.

Stepping inside the Corsair is an exercise in creating your own ideal driving environment, with a host of features designed to soothe, invigorate, and connect you to the road.

At the heart of the personalized experience is the meticulously crafted interior. Premium materials—including available micro-perforated Lincoln Soft Touch or premium leather seating surfaces—envelop occupants in comfort, with, optional in Premiere trim, heated and ventilated front seats that add a touch of sophistication and provide year-round climate control.

Be it from the stylish surroundings interior trim—with options like Star Light metallic appliqué, and Finestra aluminum appliqué, with an Ebony/Smoked Truffle palette—Corsair boasts a passenger compartment of pure stylish coziness, and an available panoramic vista roof® for those seeking some stargazing, or sky-high cityscapes from the comfort of the cabin.

Corsair's commitment to comfort, of course, extends beyond just the materials. An available power tilt/telescoping steering column with memory allows drivers to find their perfectly personalized driving position, while active noise control technology creates a serene cabin environment, minimizing distractions from the outside world. Dual-zone climate control ensures that both driver and passenger can enjoy their preferred temperature settings.

The customizable nature of Corsair extends to its technology, too. The 12.3-inch configurable instrument cluster brings with it tailored information display preferences, while the 13.2-inch LCD center stack touchscreen provides intuitive access to navigation, entertainment, and vehicle settings. The SYNC[®] 4 connectivity system seamlessly integrates smartphones—which can be powered by the optional wireless charging pad—providing access to personal favorite apps and services.

Beyond comfort and technology, the Corsair prioritizes safety and peace of mind. The standard Lincoln Co-Pilot 360™ 2.0 suite of driver-assist technologies provides a comprehensive array of features designed to help drivers stay aware of their surroundings and avoid potential collisions, including adaptive cruise control with stop-and-go and lane centering, blind spot assist, and pre-collision assist with automatic emergency braking. Giving greater choice, and confidence, the available Lincoln Co-Pilot 360 Vision 2.0 adds features such as reverse brake assist and an all-around-seeing 360-degree camera.

While Corsair employs the same responsive 2.0L I-4 turbocharged powertrain, mated to an 8-speed automatic transmission for both Premiere and Reserve trim, producing 250 horsepower and 373Nm of torque, the exterior design is equally compelling, with athletic lines and a refined silhouette.

Complemented by 18", 19", or 20" bright machined aluminum rims, or the 20" Black premium paint aluminum wheels available on the Jet Appearance Package—meaning the compact crossover's "boots" can be paired to a personal choice—is an array of spray to adorn the doors.

From Infinite Black to Harbor Gray, even the standard paint options stand out. But for Lincoln Corsair customers that want a tint that's more in tune with their identity, they can opt for Whisper Blue, a light hue that adds a splash of sophistication; Asher Gray, a medium metallic for a modern appearance; Pristine, or Crystal White, which offer a classic or metallic clearcoat appearance respectively.

The 2025 Lincoln Corsair is more than just a compact SUV; it allows its owner's personality to radiate from the inside out, and true colors to shine through.
