Doha – Qatar October 20, 2025 This October, the EXEED International User Summit hosted a dynamic track test drive in Shanghai, welcoming 124 guests from 24 countries. The event featured both live driving sessions and static vehicle displays, giving attendees firsthand access to EXEED's groundbreaking innovations in electrification, hybrid technology, intelligent features, and design.

BEV Highlights: High-Performance ES and ET Models

EXLANTIX, EXEED's premium NEV brand, introduced its BEV lineup with supercar-like acceleration and advanced engineering. The ES BEV boasts a drag coefficient of 0.205Cd, 8,000 N·m of torque, and sprints from 0–100 km/h in just 3.7 seconds. Its IAS intelligent air suspension and CDC adaptive damping work together to ensure minimal body roll and precise handling at high speeds.

Similarly, the ET BEV delivers 353 kW of power and reaches 100 km/h in 4.8 seconds. Its class-leading chassis setup and ultra-small turning radius of 5.65 meters make it agile and practical. Norwegian auto influencer Falch Krister Riis praised the cars' acceleration, comfort, and rapid charging.

Hybrid Highlights: ET REEV and RX PHEV Lead a Versatile Lineup

EXEED's hybrid lineup drew significant attention, led by the ET REEV and RX PHEV. The ET REEV introduces the Golden Extended-Range system, achieving 44.5% thermal efficiency and producing 3.7 kWh of electricity per liter of fuel – best in class. Its dual-motor AWD setup enables 0–100 km/h in 4.9 seconds and delivers an EV-like driving experience even when the battery is depleted.

The RX PHEV features the world's only Quad-Motor AWD PHEV system, offering 395 kW of total output and a robust 650 N·m of torque. It also accelerates from 0–100 km/h in 4.9 seconds and provides a driving range of over 1,300 km, addressing long-distance travel needs without range anxiety.

Smart Tech: VPD and RPA for Seamless Parking

EXEED also showcased intelligent features like VPD (Valet Parking Drive) and RPA (Remote Parking Assistance), integrated into the ET and ES models. VPD includes Remote Valet Parking and Smart Summon, allowing the vehicle to park and retrieve itself autonomously. Meanwhile, RPA offers hands-free parking and exit in tight spaces, activated via Bluetooth or key fob.

Premium Design: E02 and MX Stun in Static Display

In the static area, the E02 and MX models turned heads with striking designs. The E02 features a “Cloud Waterfall” grille and “Sunset Glow” tail lamps, blending Eastern aesthetics with modern tech. The MX, adorned with a 3,499.3 mm “Starwing” light strip and five-spoke star-pattern wheels, presents a minimalist, futuristic elegance that embodies EXEED’s tech-premium identity.

The Shanghai test drive affirmed EXEED’s leadership across BEV, REEV, PHEV, and ICE platforms.

Looking forward, EXEED aims to bring its premium NEV offerings to European markets like Norway and Denmark, expanding its global footprint with innovative, high-performance mobility solutions.

Silver Lake Motors invites Customers to explore the EXEED lineup by visiting the flagship showroom at West Walk , a symbol of sophistication and elegance. For more information or to arrange your test drive, stop by the EXEED showroom or call 800 1115.
