Doha, Qatar, October 31, 2025—The Qatar Cancer Society organized the Relay for Life Cancer

Awareness Walk at Aspire Dome, bringing together hundreds of participants, including cancer survivors, healthcare professionals, families, and community members.

The event aimed to raise awareness, celebrate survivors, and promote unity, hope, and resilience in the collective fight against cancer.

Relay for Life is a global movement dedicated to increasing cancer awareness and raising funds to support prevention, treatment, and patient care. This inspiring initiative honors those who have survived cancer, remembers loved ones lost, and supports individuals currently battling the disease.

Participants took part in a symbolic walk representing the ongoing journey of courage, solidarity, and determination to create a future free from cancer. Each step served as a message of hope and commitment to a healthier world.

The event also highlighted the importance of early detection, regular screenings, and healthy living in reducing cancer risks. Through shared stories, awareness campaigns, and community participation, Relay for Life fosters compassion and collective strength in confronting one of the world's most pressing health challenges.

As participants lit the path of hope, their walk became a tribute not only to themselves, but to everyone touched by cancer.
