Doha, Qatar–December 23, 2025- Silver Lake Motors – a subsidiary of Al Mana Holding, marked a major milestone with the successful launch of the **EXEED EXLANTIX** in Qatar. The prestigious unveiling, held at **EXLANTIX** Showroom in West Walk, brought together VIP guests, customers, media representatives, and automotive enthusiasts for the brand’s groundbreaking new-energy models. The event introduced the Qatari market to **EXLANTIX**’s most advanced vehicles to date, reflecting the brand’s commitment to redefining premium mobility through innovation, craftsmanship, and forward-thinking engineering.

At a time when the global automotive landscape is rapidly transitioning toward sustainable technologies, **Silver Lake Motors** continues to champion this evolution in Qatar. By introducing the **EXLANTIX** range—built on cutting-edge electric and extended-range powertrains—the company is delivering vehicles that not only enhance driving pleasure, performance, and comfort, but also contribute to a cleaner, more eco-conscious future. The **EXLANTIX ET and ES** are precisely engineered to combine powerful electric capability, exceptional range, refined luxury, and an environmentally responsible design that aligns with Qatar’s 2030 vision for sustainable development and advanced mobility solutions.

Moncef Ahabchane, Chief Operating Officer, Silver Lake Motors, said, “Introducing the **EXLANTIX** to the customers in Qatar represents a meaningful step in our commitment to

redefining premium mobility in the country. These models embody the essence of the **EXEED** brand, uniting advanced luxury electric technology, refined craftsmanship, and intelligent design to create vehicles that are both environmentally responsible and exceptionally enjoyable to drive. With their powerful electric drivetrains, extended operating range, and sophisticated comfort systems, the **EXLANTIX ET and ES** reflect our dedication to delivering innovative solutions that elevate every aspect of the driving experience.”

He added, “This moment is especially important for us because it aligns so closely with the evolving expectations of Qatari customers. Drivers in Qatar value luxury, performance, and technology, while also showing increasing interest in sustainable mobility. The **EXLANTIX** range is engineered with these priorities in mind, offering climate-resilient performance, long-distance capability, and features tailored to regional conditions. As Qatar continues progressing toward its sustainability goals, **Silver Lake Motors** is proud to support this national vision by offering vehicles that reduce emissions without compromising on quality or driving pleasure.”

Features

The **EXLANTIX** range is positioned as a high-tech, luxury-focused expansion of EXEED’s global offerings, with Qatar identified as one of the key markets. The models are the **EXLANTIX ET** (a mid-to-large SUV) and the **EXLANTIX ES** (a premium electric sedan). These models are designed

with advanced electrified powertrains, luxurious interiors, and extensive climate-adaptation features that suit Qatar driving conditions.

The **EXLANTIX ET SUV** will be offered in both **pure electric (BEV)** and **range-extended electric (REEV)** versions. The REEV model delivers a remarkable combined driving range of over **1,300 km**, making it particularly suitable for long trips across the GCC. Fast-charging capability allows the battery to charge from 20% to 80% in under 20 minutes. High-output all-wheel-drive variants deliver strong performance with advanced torque distribution for stability on both highways and off-road environments. The ET also supports multiple drive modes—including sand/off-road settings—making it ready for mixed driving needs.

Inside, the **ET** is designed to offer a **luxury and health-focused cabin**, featuring eco-friendly materials, a 5A-rated healthy cabin environment, and advanced air purification systems capable of filtering ultrafine particles. The seats are finished in premium materials and offer ventilation, heating, multi-position adjustment, and massage functions. Noise-reduction engineering, including acoustic glass and triple door seals, ensures that the cabin remains quiet even at speed—enhancing comfort for long-distance travel or daily commutes. These comfort-focused features have been tailored to meet the expectations of Middle Eastern customers, who face high temperatures and dusty driving conditions.

The **EXLANTIX ES** adds a sportier, more aerodynamic option to the lineup. With a low drag design, flush exterior surfaces and advanced electric motors, the ES produces up to **480 HP**, enabling 0–100 km/h acceleration in approximately 3.7 seconds. Despite its performance focus, the ES emphasizes passenger comfort with a spacious interior, long wheelbase, premium Nappa leather seating, and advanced climate control. A panoramic roof and high-resolution infotainment systems add to its upscale character, making it suitable for buyers seeking a luxury EV with strong performance.

Safety and reliability are also a major focus for the **EXLANTIX** range. The ET has already earned **5-star scores** under updated crash-test standards and includes comprehensive air-quality monitoring, electromagnetic safety protections, and a robust body structure. Additionally, chassis and suspension systems, including air suspension and adaptive damping, help ensure smooth driving on Qatar's highways and uneven terrain. Features such as run-flat tires, strong climate tuning, and enhanced cooling systems further support operation in high-temperature environments.

Silver Lake Motors introduction of these models will offer customers a new category of electrified luxury vehicles that combine the practicality of advanced hybrid and electric systems with premium interior refinement and the driving confidence required for both urban roads and

desert landscapes.

Customers can explore the **EXEED EXLANTIX** lineup by visiting the flagship showrooms in **West Walk**, a symbol of sophistication and elegance. For more information or to arrange your test drive, stop by the **EXEED** showroom or call 800 1115.
