Kyiv, April 20 (QNA) Ukraine announced Monday that its air defenses intercepted a Russian drone attack last night, shooting down 113 drones launched at various locations across the country.

Ukrainian news agency (Ukrinform) reported that its air defenses successfully downed 113 out of 142 drones over northern, southern, and eastern Ukraine.

According to preliminary data, the impact of 28 attack drones was recorded at 18 locations, while debris from downed drones was found at six sites.

Since Feb. 24, 2022, Russia and Ukraine have issued near-daily reports on the course of the fighting and the affected areas. However, due to the ongoing war and the nature of the conflict, these statements cannot be independently verified.
