Amman, April 21 (QNA)– Jordan warned Tuesday of serious repercussions over continued incursions by extremist settlers into the Al Aqsa Mosque compound, urging international action to halt Israeli violations in Jerusalem and the occupied West Bank.

The Jordanian Ministry of Foreign Affairs, in a statement, condemned the latest raid, citing provocative acts including the raising of Israeli flags under police protection, calling it a flagrant breach of international law and the status quo.

It rejected repeated incursions and attempts to impose new realities, including temporal and spatial division of the site, reaffirming that the mosque, with its 144 dunams 144 dunams, remains an exclusively Muslim place of worship under the Jerusalem Waqf and that Israel has no sovereignty over occupied Jerusalem.
