Moscow July 23 (QNA)– The Russian Defense Ministry announced Tuesday, the destruction of 25 attack drones launched by Ukraine Monday night.

According to a statement issued by the Russian Ministry of Defense, the air defenses destroyed about 21 drones over the Crimean Peninsula and the Black Sea, while two were shot down over Bryansk and two over Belgorod.

It is worth noting that since the outbreak of the military operation in Ukraine in February 2022, conflicting reports have emerged regarding the extent of losses suffered by both sides of the conflict. Each side claims to have inflicted severe losses on the other.
